ETHUSDT	L	A	+\$512.60	1:4.2	1d 3h

CORE CAPABILITIES

AI Call Analyzer

Paste any analyst call — Claude extracts entry/SL/TP, scores the setup 1-10, checks ATR noise, portfolio correlation, and your personal rulebook.

Setup Scanner

Scans 100 USDT-M symbols every 30 min. 3-stage pipeline: confluence → quality gate → AI scoring. Sends Telegram alerts for 6+/10 setups.

Live Trade AI

Real-time AI analysis on every open Bitget position: risk rating, Hold/Close/Adjust recommendation, SL/TP suggestions, historical context.

Hindsight Analysis

Retroactively scores your last 50-100 trades using historical candle data. Shows how your P&L would differ following AI recommendations.

Edge Lab

Self-learning Trader Rulebook synthesised from your own trade history. Pattern detector finds win/loss patterns by setup, session, weekday, and direction.

Chart Explorer

Any Bitget symbol, any timeframe. Multi-TF trendlines, S/R boxes, full indicator panel. Opens detached chart with entry/SL/TP levels pre-drawn.
